MOSTAFA ABOGAZIA

Front End Developer

Egypt / Ismailia | +20 : 01121863867 | mostafa.abogazia@gmail.com | linkedin.com/in/mostafa-abogazia

CAREER SUMMARY:

I am a Front-End Developer with experience in building modern, responsive websites and web applications using HTML, CSS, JavaScript, React, and Next.js. I focus on delivering smooth user experiences and elegant designs, with attention to detail and performance optimization.

PROJECTS:

Project 1 :

I have created a website using HTML, CSS, and JavaScript that showcases a range of audio products such as earbuds and headphones, with details about each product, including specifications and prices. The site also includes information about features like Bluetooth connectivity and battery life. It allows users to explore different options and make purchases.

Project 2 :

I built an e-commerce platform using React to showcase various products. The user-friendly interface features detailed information, images, and easy purchase options, along with sections for featured products and categories. This project demonstrates my web development skills with React!

Project 3 :

I created a website that resembles a dashboard for tracking sales and revenues using Next.js. It contains information such as daily and total revenues, along with details about recent orders and customers. If you need more information or specific details, feel free to visit the website directly.

EDUCATION:

WE Secondary School for Applied Technology

High Diploma (Currently enrolled)

Activities and Societies
- Student at WE School

SKILLS:

- HTML
- CSS
- JavaScript
- Tailwind CSS
- React.js
- Next.js
- TypeScript
- Responsive Web Design
- Git
